Summary

Full-stack Lead Engineer with 6+ years of experience building scalable enterprise applications. Proven track record of leading engineering teams and developing AI-powered solutions. Combines technical depth with strong leadership to deliver products that drive real business outcomes.

Work Experience

Chatham Financial Corp. | PA, USA

Engineering Manager

Mar-2026 - Present

Lead Engineer | Senior Software Engineer

Nov-2024 - Mar-2026

Full Stack Software Developer

Feb-2023 - Nov-2024

- Led and mentored a team of 5 engineers as Engineering Manager and Technical Lead, owning architecture and delivery of an AI-powered onboarding platform that reduced client data onboarding time by **75%** across multiple business units.
- Defined technical strategy and modernized systems using **.NET Core, microservices, React/Angular, and event-driven architecture (NServiceBus, DDD)**, improving scalability, reliability, and performance.
- Championed engineering excellence by increasing automated test coverage by **80%**, implementing Playwright E2E tests and CI/CD practices, significantly reducing defects and manual QA effort.
- Partnered with Product and stakeholders to translate business goals into roadmaps and execution plans, ensuring predictable, on-time delivery of high-impact features.
- Drove AI adoption organization-wide through a cross-functional working group, establishing standards, evaluating tools, and enabling teams to integrate AI capabilities into products.
- Scaled and strengthened the team through hiring, mentoring, and coaching, improving technical quality, ownership, and delivery consistency.

My Money Karma Inc. | CA, USA

Full Stack Intern

Jun-2022 - Aug-2022

- Engineered critical features for applications serving thousands of users, ensuring scalability, robustness, and optimal performance.
- Developed reusable React components and a sign-on module to enhance code maintainability, foster consistency, and ensure uniform user authentication.
- Implemented automated E2E testing frameworks using Cypress, reducing manual testing efforts and improving efficiency.
- Led proof-of-concept initiatives to integrate new technologies, driving innovation and continuous improvement.

Eurofins IT Solutions Pvt Ltd | Bangalore, India

Software Engineer

Apr-2020 - Jul-2021

Associate Software Engineer

Aug-2018 - Apr-2020

- Designed and maintained scalable microservices in .NET C#, ensuring flexibility and robustness in distributed architectures.
- Migrated .NET Framework MVC applications to microservices, leveraging modern architectural patterns to improve performance and maintainability.
- Collaborated with business analysts and product owners to translate business needs into actionable deliverables, aligning with organizational objectives.
- Architected reusable Angular UI components aligned with industry-standard UX guidelines, enhancing user engagement and satisfaction.
- Developed comprehensive integration, unit, and web test suites, ensuring high software quality and reliability across all application layers.
- Created optimized database structures, including stored procedures, seed data, and migration scripts, to ensure data integrity and scalability.

Education

Masters - Computer Science - University at Buffalo, The State University of New York

2021-2022

Bachelors - Computer Science - New Horizon college of Engineering

2014-2018

Skills

Languages: C#, Python, TypeScript, JavaScript, HTML, CSS

Frameworks: .NET Core, Angular, React, Node.js, NServiceBus, ServiceStack, Entity Framework, Dapper

Architecture: Microservices, Domain Driven Design, Event Driven Architecture, RESTful APIs

Testing: Playwright, Cypress, SpecFlow, xUnit

Databases: MS SQL, MongoDB, PostgreSQL

AI Tools: Claude, GitHub Copilot, Cursor, OpenAI Codex

Projects

- **Bhavan-Portfolio** - A responsive and modern developer portfolio created using Blazor WebAssembly and Tailwind CSS. It incorporates smooth navigation and supports both dark and light themes. (Blazer, .Net)
- **Budget App** - A full-stack Progressive Web App (PWA) for budgeting, featuring AI-powered financial insights, smart transaction tracking, dynamic data visualizations, and analysis of month-over-month spending trends in a modern dark mode interface. (.Net, React, PostgreSQL, Azure, OpenRouter, PWA)
- **Full Stack Builder** - A Command Line Interface (CLI) tool for scaffolding production-ready applications. The tool features interactive setup and is built on a clean architecture stack, including .NET 10, Angular 21/React 19, Docker, and PostgreSQL. (NodeJs, React, Angular, .Net, PostgreSQL, Docker)
- **Architect for Men - Hair Design** - Interactive web application for AFM-HD to share GPS location of RV, assist in digital marketing, send push notifications, and facilitate customer scheduling. Developed an admin dashboard for complete website control. (Angular, Python, MySQL, AWS)
- **Pharma-Supplychain-Blockchain** - End-to-end Dapp Application for pharmaceutical supply chain management using Ethereum Blockchain and MongoDB. (Blockchain, Python, MongoDB, Angular)
- **Transportation-Bus-Tracker** - Web application for bus location tracking and user notification using distributed and pub-sub systems. (Angular, Python, MongoDB, Docker, Kafka)
- **RAILTRACK** - An intelligent natural language voice assistant for real-time railway information using Google Assistant. (Dialogflow, Firebase, Google Cloud)

Awards and Recognition

- **Star Performer Q1 2020:** Eurofins IT Solutions
- **2nd Place, EOL Hackathon 2019 :** Eurofins IT Solutions Pvt, Ltd
- **Star Performer Q2 2019:** Eurofins IT Solutions
- **2nd runners : TechHorizon 2018 :** Project Exhibition and conference, NHCE
- **Entrepreneurship Challenge Award 2017 :** IBM UC Berkeley-Andhra Smart Village Hackathon organized at KL University
- **Filed 7 Group Patents** part of R&D Team of New Horizon College of Engineering.
